

A bright idea ...

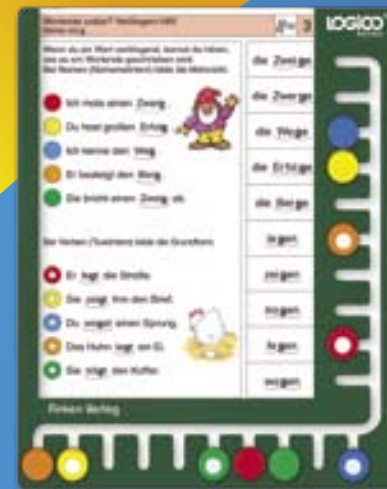

... to fulfil teachers' wishes:

- promote and motivate the children individually
- ensure independent and self-directed learning and training
- periodical evaluation of the children's knowledge status
- purposefully design additional weekly tasks and special training schedules
- enable learning that is orientated to the competences of the individual child
- offer extra training units for afternoons
- and so on ...

# LOGICO®

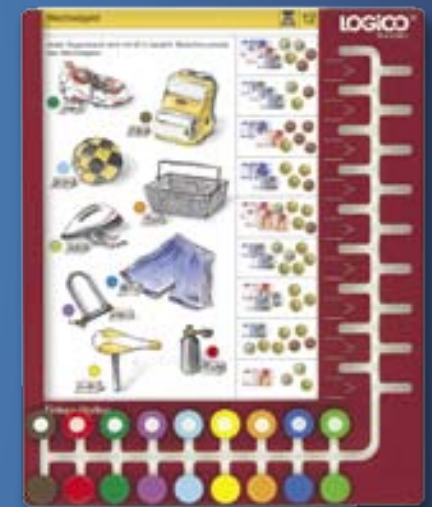

The learning system teachers and learners can rely on.

Easy-to-handle. Compact. Motivating.

## LOGICO® PICCOLO

Board with  
10 movable buttons  
for children aged 5 to 10

## LOGICO® MAXIMO

Board with  
18 movable buttons  
for children aged 8 to 12

The learning system with perfect self-checking.

## This is how it works:

1

Insert the LOGICO card into the LOGICO board. Each assignment on the card is marked by a colour. The children solve the assignments and move the coloured buttons to the correct answer positions on the right side of the LOGICO board.

2

For self-checking the children take out the card, turn it around and insert it back into the LOGICO board. The answers are correct if the coloured dots on the card and the buttons match.

### LOGICO®

- is compact and stable
- no loose parts that can get lost

### LOGICO®

- highly motivational
- promotes independent learning
- offers self-checking and confirmation of accomplishment
- means enjoyable learning

### LOGICO®

- supports teachers in their daily work
- facilitates individual training
- always ready-to-use
- does not require extensive preparation

## Attractively designed learning cards

- covering all major primary school subjects and curricula
- gives clear instructions for the tasks,
- with motivating and entertaining illustrations,
- with self-checking by colour codes and solutions by turning the card,
- with additional tasks,
- and so on ...

## ensure

- motivation
- self-reliance
- confirmation of accomplishment
- enjoyable learning.

offers manifold exercises for various learning situations.

### ... for free learning activities

The children can themselves choose what they are really interested in. They can check their knowledge status and enhance it at any time.

### ... as supplementary learning material

LOGICO provides manifold opportunities to reinforce the subject matter – suitable to the theme of the respective lesson – by training and repeating.

### ... for differentiation, e.g. weekly additional tasks and advancement schedules

Teachers can put together special training units for individual children by selecting exercise cards for their individual weekly additional tasks or advancement schedules.

**... at work stations**

Teachers can equip single work stations with selected LOGICO cards or LOGICO test sheets.

**... for support lessons and  
on manifold occasions.**

# LOGICO<sup>®</sup>-boxes

LOGICO-boxes comprise all the advantages of LOGICO.

LOGICO-boxes for the subjects German, Mathematics and General Knowledge contain

- up to 160 cards full of comprehensive and differentiated training offers
- a rich teacher's manual with up to 26 test sheets for evaluation, master copies for documenting the children's progress and a "mini learner" for children to keep a record of their work.

supports independent and self-directed learning.

## Children can look for the exercise cards by themselves

LOGICO boxes are put at a fixed place in the classroom. A well-conceived order system enables children to easily find their learning card. Each learning unit is marked by an icon and the cards within one unit are numbered. Thus the children can select and rearrange the cards quickly and without further help.

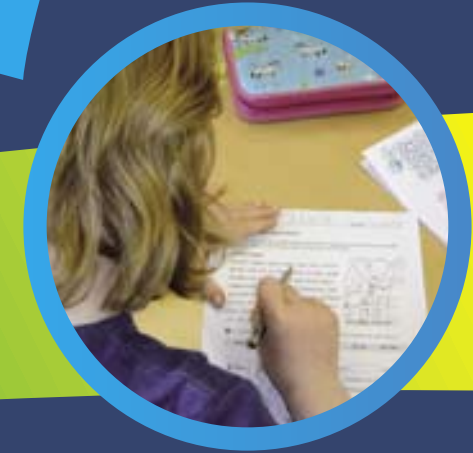

## Independent learning, self-checking and correction

With LOGICO children can work self-directedly, independently of the teacher and at their own pace. They solve one question after the other and can – in between – check and correct themselves. The reverse side of the card shows the answers and also the correct solutions. In this way, children who made a mistake will see the correct solution.

## Documentation of the learning process

The children have their own little booklet, the "mini learner". Here each card is marked after the task has been successfully solved. In the "mini learner" the children document their learning process, diligence and achievement. The teacher can see in the "mini learner" which cards each child has done so far.

## Evaluation and documentation of the learning progress

For each learning unit the teacher's manual offers master copies for test sheets which the teacher can use to check the learning progress. This is a valuable documentation for evaluation.

# LOGICO®

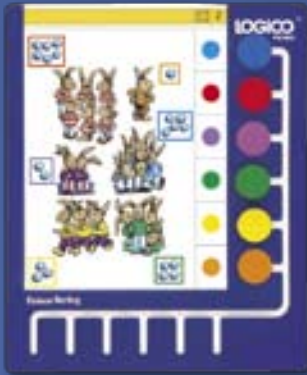

at a glance.

LOGICO is a learning system with self-checking, ideal for independent, differentiated and individualized learning.

It can be used at kindergarten, at school and at home.

For every age group there is the right LOGICO version:

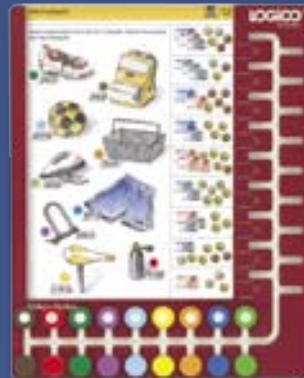

## LOGICO® PRIMO

Board with  
6 movable buttons  
for children aged 3 to 6

## LOGICO® PICCOLO

Board with  
10 movable buttons  
for children aged 5 to 10

## LOGICO® MAXIMO

Board with  
18 movable buttons  
for children aged 8 to 12

## LOGICO helps children to improve:

- Brain development, including concentration, visual perception, imagination, logical and geometrical thinking ...
- Problem solving skills
- Reading and writing
- Mathematics
- English
- General knowledge

## Learning with LOGICO is fun for children because of

- the user-friendly compactness of the learning tool – no loose parts
- the attractive and highly motivational learning cards
- the immediate self-checking which promotes self-evaluation and assessment
